

Climate Change and the Community

As part of Council's ongoing commitment to improving the sustainability of Maroondah, Council is holding two workshops on Climate Change and Energy Efficiency.

Workshop One 'All About Climate Change' is focussed on Climate Change and understanding our Ecological Footprint. It is focussed on providing a background on the need for energy efficiency and behaviour change. The session includes a presentation by an AI Gore Climate Ambassador.

Workshop Two 'Combating Climate Change at Home' is focussed on practical actions you can take to save energy and reduce your Ecological Footprint. The session will cover action from simply turning off lights to incorporating energy efficient design into building and renovation.

You are welcome to attend both workshops.
